

## Gas Meter Box Repairs Update

Phoenix Natural Gas may supply a meter box at the point of connection, but upon completion it will belong to the property owner and form part of the fabric of the building. It will thereafter be the responsibility of the property owner to ensure that it is adequately maintained.

If the meter box becomes damaged it is possible for property owners to obtain replacement parts for their damaged meter box and to self-repair. Phoenix schedule of charges detail those items where self-repair may be feasible and where replacement parts might be obtained. The details can be viewed [here](#).
